

# Thank you

Dear CMS Teachers,

My child started attending CMS when he was 18 months old, and he had a hard time for the first two months because he hit his friends and did not follow the teacher's instructions. As parents, we felt very sorry and tried to fix him, but the evangelist said that during this period, He said that it would pass anyway and that we should pray to God to resolve it. He also encouraged us to think deeply about what God wanted to say to our parents and teachers through Juwon and to pray more. Other schools If it had been the same, I would have received many warnings and harsh stares, but everyone at CMS prayed for my child and for us and treated him with warm hearts. Fortunately, my child is now enjoying his school life without any problems. . When I say "let's go to school" in the morning, I see the back of my child excitedly putting on his shoes and leading the way, and I feel that the difficulties he had gone through a while ago have been replaced with a warm and excited heart.

# Thank you

And through Montessori education, children are guided to feel each sense and learn a lot on their own. So, when I see them organizing and tidying up, as well as words and actions that were not taught at home, I think the power of education is enormous. English and Korean And acquiring both at the same time is a bonus.

I am grateful to God and the CMS teachers who made all this comfortable. We will keep our child at CMS as long as possible and support and pray for him.

Best regards,  
주원이 엄마
